Scenario

You just moved to a new city because of the job opportunity you received. After being in the city for a while, you decide you want to get out and explore what the city has to offer. You want to find stuff to do online in your free time.

Task 1: Login/Sign up to the app or sign in as a guest.

Task 2: Mark the activities you are interested in and the radius you are willing to travel.

Task 3: You liked the cooking show! Find and print out your ticket and also go back on the app and give it a rating!

Notes

What changes should you make to your application:

User 1 Cons:
- Separate the login/sign up screen from the guest screen
- Not being able to search out more specific things

User 2 Cons:
- Let it be easier to go back if someone made a mistake
- More options for specific events, only select few

What you need to keep the same for your application:

User 1 Pros:
- The app is very neat
- Very user friendly

User 2 Pros:
- Very easy to understand
- Perfect for someone who is bored
